Science Fair Project Proposals

Write two 100 word proposals to solve a problem or question. Your ideas must be creative, detailed, realistic and informative. Use this page to help you brainstorm. Type or neatly hand write your proposals on two separate clean sheets of paper. This assignment is due the first week of school.

Simple

Idea should have one main focus.
Keep proposal clutter free.
Too many ideas can overwhelm the audience.

We need new ideas from young bright scientists like yourself. Think outside the box. Give an idea that we haven't heard yet. Be creative!

Creative

Realistic

Make sure your idea can help people in our community.
Think about what your mom, dad, or friends need to help them solve problems!

When you provide background information, you help your audience understand why your idea is important.
Provide one statistic with the source.

Informative
